Bank Marketing Campaign Analysis — Final Report

Introduction

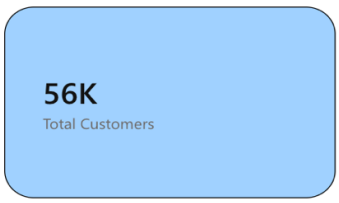
This report analyzes the performance of a bank's marketing campaign using customer demographic data, contact history, and subscription outcomes. The goal is to identify which customer segments respond best and recommend strategies to improve future campaigns.

A Power BI dashboard was developed to visualize KPIs, customer behavior, and conversion patterns.

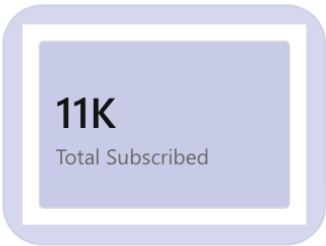
Executive KPIs

The following KPIs were selected for executives because they reflect campaign scale, success, and efficiency:

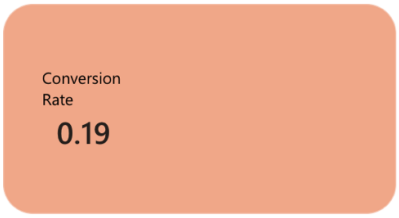
1. Total Customers Contacted → Measures campaign reach.



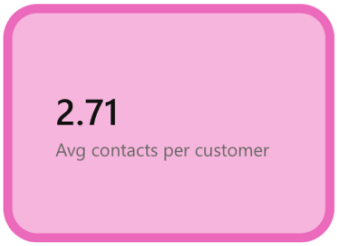
2. Total Subscribed → Total successful conversions



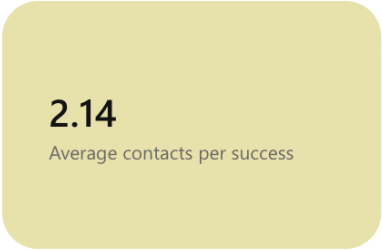
3. Conversion Rate → Percentage of customers who subscribed



4. Avg Contacts per Customer→ Effort required per customer



5. Avg Contacts per Success→ Effort required per successful conversion



DAX Measures Used

Total Customers Contacted = COUNTROWS ('Bank Target Marketing')

Total Subscribed = SUM ('Bank Target Marketing'[SubscribedFlag])

Conversion Rate = DIVIDE (SUM ('Bank Target Marketing'[SubscribedFlag]), COUNTROWS ('Bank Target Marketing'))

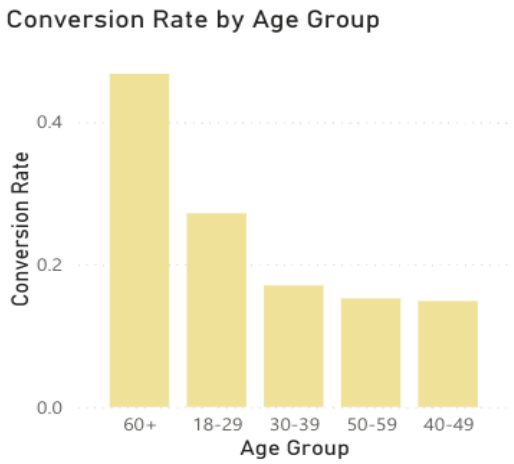
Avg Contacts per Customer = AVERAGE ('Bank Target Marketing'[campaign])

Avg Contacts per Success = VAR Subscribed Rows =FILTER ('Bank Target Marketing', 'Bank Target Marketing'[SubscribedFlag] = 1) RETURN AVERAGEX (Subscribed Rows, 'Bank Target Marketing'[campaign])

Customer Segment Insights

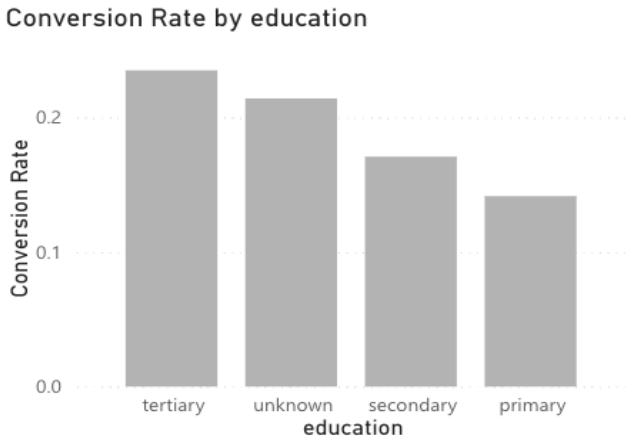
Conversion Rate by Age Group

- The **60+** age group shows the highest conversion rate.
- Younger customers (18–29) also respond well.
- Middle-aged groups (30–49) convert at lower rates.



Conversion Rate by Education

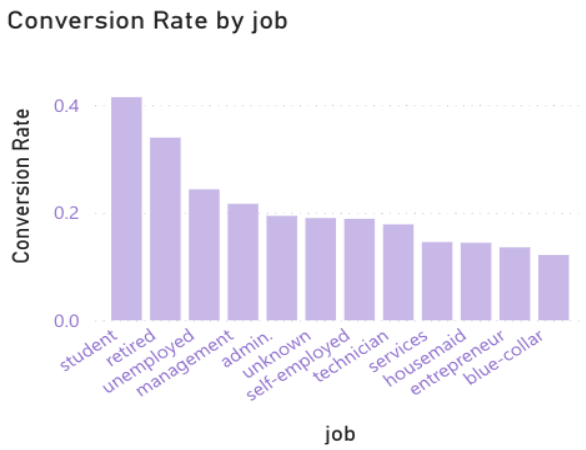
- Customers with **tertiary education** convert at the highest rate.
- Primary and secondary education groups show moderate conversion.



Conversion Rate by Job Type

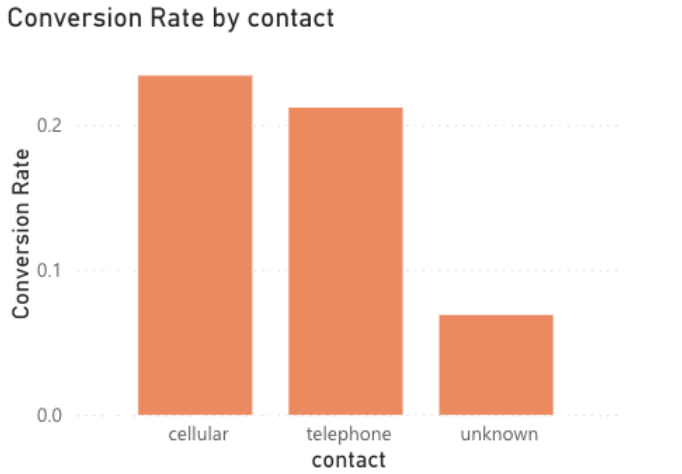
- **Students**, **retirees** show strong conversion.

- Technical and service roles convert at lower rates.



Conversion Rate by Contact Method

- **Cellular contact** performs best.
- Telephone and unknown channels underperform.



Recommended Target Segment

Based on conversion performance, the bank should prioritize:

Primary Target: Age 60+

- Highest conversion rate
- Lower contact effort
- Strong interest in long-term savings products

Secondary Targets: Students & Retirees

- High responsiveness
- Clear financial motivations
- Strong alignment with product offering

Best Contact Channel: Cellular

- Highest conversion
- Most efficient
- Lower customer resistance

Recommendations for Next Campaign

1. **Prioritize high-conversion age groups (50–59, 60+).** These segments deliver the strongest ROI.
2. **Shift outreach to cellular contact.** This channel consistently outperforms others.
3. **Optimize contact frequency.** Reduce repeated calls and use SMS/email follow-ups.
4. **Personalize messaging by job and education segments.** Tailored communication increases engagement.
5. **Improve data quality for 'unknown' categories.** Better segmentation → better targeting → better results.

Conclusion

The dashboard reveals clear patterns in customer behavior and conversion performance. By focusing on high-performing segments and optimizing contact strategies, the bank can significantly improve the efficiency and effectiveness of future marketing campaigns.

The accompanying Power BI dashboard provides an interactive view of these insights and supports data-driven decision-making.
